

What's Up?

From TrioTwin to OptiFlyer in Ahlstrom La Gère PM6

- Glassine (70° SR - no charges)
- 5,5 m width,
- 100% virgin,
- 40 to 120 g/m²,
- 340 to 880 MPM.

- TrioTwin was the Top Reference on the machine: runability, drainage, stability, resistance and speed record.
- The deal for OptiFlyer was simple: to reach at least these performances. OptiFlyer did it.
